What Is Fear?

- Fear is a natural, powerful, and primitive human emotion.
- It involves a universal biochemical response as well as a high individual emotional response.
- Fear alerts us to the presence of danger or the threat of harm, whether that danger is physical or psychological.

If it was possible to ask the monkeys why they would beat up all those who attempted to go up the ladder.....
I bet you the answer would be ...
"I don't know - that's how things are done around here"
Does it sound familiar?

It was a great Initiative by AICTE FDC. I am thankful to AICTE for giving me this opportunity to conduct online STTP for faculty members of technical and institute industry expert of India free of cost. I got huge response from registration as well as lots of compliment of arranging the online short term training program, especially about speakers and delivery of contents. I really thanks to AICTE for providing me such facility to arrange such learning and motivational events.
