The Squid Game event consisted of three levels, each with its own unique challenge. The first level was a Tug of War competition, where the teams competed against each other to see who had the strongest teamwork and physical strength. The winning team then moved on to the second level, Red Light Green Light, which tested the participants' coordination and quick thinking. Finally, the last level being Musical Chairs. The three levels of the Squid Game event provided a well-rounded experience for the participants, as they were able to showcase their physical strength, coordination, quick thinking, creativity, and adaptability.

In addition to providing a fun and interactive experience, the Squid Game event also helped to foster teamwork and collaboration among the participants. The event was an excellent opportunity for students to connect with one another and develop new relationships, while also improving their problem-solving and critical thinking skills. The objective of the event "Squid Game" organized by the Shrink Club of the Department of Computer Science & Engineering was to provide a unique and engaging experience for the participants. The event aimed to bring together students from the Computer Science & Engineering department and provide them with an opportunity to showcase their problem-solving skills, teamwork abilities, and creativity.

Through the competition, the participants were challenged to work together to complete various tasks inspired by the famous drama series Squid Game. The event was designed to be both educational and entertaining, as participants had to think critically and apply their knowledge in a practical setting.
