

**5th International Conference
On
Computational & Experimental Methods in Mechanical Engineering**

20th – 21st November, 2025

Publication Ethics

As an author or presenter, it is imperative to uphold the highest standards of ethics and integrity in all facets of your work. Adhering to ethical guidelines is essential to maintain the credibility of your research and its presentation. Authors are urged to follow the publication ethics outlined below:

- ✓ Conduct research and present findings without fabrication or data manipulation.
- ✓ Limit authorship to those who have significantly contributed to the execution and presentation of the research.
- ✓ Accurately acknowledge all authors and recognize the contributions of others who have provided assistance or resources.
- ✓ Disclose any potential conflicts of interest that may impact the review process and publication of the manuscript.
- ✓ Confirm that all listed authors have agreed to be named and have made significant contributions to the work.
- ✓ Ensure the originality of your research through proper citation of resources used.
- ✓ Avoid plagiarism and present complete data in your research.
- ✓ Maintain data confidentiality and respect the privacy of individuals involved in the research.
- ✓ Adhere to publication policies and regulations.
- ✓ Take responsibility for the reliability and accuracy of data and research by providing complete information required for review and publication.
- ✓ Ensure all data aligns with ethical research practices.
- ✓ Respect and accept reviewers' decisions regarding manuscript publication.
