

**Name of Journal:** JOURNAL OF ADVANCED RESEARCH IN CIVIL AND ENVIRONMENT ENGINEERING

**Name of Publisher:** Advanced Research Publications

**Other Details:** Volume 7, Issue 3 & 4, December (2020)

**Read More:**

### **ABOUT THE JOURNAL**

Journal of Advanced Research in Civil and Environmental Engineering is a peer reviewed Journal and it is devoted to the publication of original scientific research findings, methodological developments, and opinions in the form of original and review articles, brief reports, letters to the editor, proceedings of symposia, debates, etc.

### **Focus & Scope**

Civil Engineering in general and its allied areas, Information Technology applications in Civil Engineering, Environmental Engineering, Structural Engineering, Planning and Management of the Construction of Structures, Safety Engineering, Materials Procurement, Budgeting & Cost Engineering, Building and Site Layout Surveys, Quality Assurance and Quality Control, Sustainable Materials and Structural Systems, Microstructure and Materials Properties, Materials and Structural Integrity, Highways & Transportation engineering, Project Organization and Management, Lifecycle Performance Engineering, Geometrics, Geosciences, Remote Sensing, Geographical Information systems, Intermodal Transportation Research, Critical Infrastructures, Hydraulics & Water power engineering, Hydrology Science and Technology, Flood modeling and its impacts, Flood risk management, Reliability and Safety issues in construction, The Built Environment and Asset Management, Surveying and other verticals, Railways Engineering, Collaborative Engineering, Strategic Engineering Asset Management, Concrete Mix Design, On Site Material Testing.
