

Name of Journal: INTERNATIONAL JOURNAL OF STRUCTURE ENGINEERING (IJSE)

Name of Publisher: IAEME Publications

Other Details: Volume 7, Issue 2, July - December (2020)

AIM AND SCOPE

International Journal of Structural Engineering (IJSE) is an international journal dedicated to the latest advancements in structural engineering. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of structural engineering.

SUBJECT AREA

All manuscripts must be prepared in English and are subject to a rigorous and fair peer review process. Accepted papers will immediately appear online followed by printed hard copy. International Journal of Structural Engineering (IJSE) is a peer-reviewed international journal which offers wide ranging and comprehensive coverage of all facets of structural engineering and project management. It aims to advance the science of structural engineering, harmonize construction practices with design theories, and further education and research in structural engineering and management. Subject areas are welcome on various aspects of subject in the field of Structural Engineering, including the following:

- Analytical and design methods
- Dams, Bridges, Buildings and Special Structures
- Case studies and failure investigation
- Innovations in design and new technologies
- Performance of Structures
- Repairs, Strengthening, and Maintenance
- Stability Engineering
- Optimization
- Soil-Structure Interaction
- Standards and Codes of Practice
- Structural and Solid Mechanics
- Structural Safety and Reliability
- Experimental Studies and Testing Technologies
- Vibration, Impact and Structural Dynamics

Wind, impulse and Earthquake Engineering
